* Should minor air leakage occur between the body and gas connection castings on burners manufactured prior to September, 1996, it will be necessary to install this new gasket. At the same time, it will be necessary to replace the copper-clad "gasket" and install a new gas connection. All three parts are to be ordered from the factory. Part numbers are listed in the above chart. To verify that you have received the proper gas connection, the "X" dimension of ²⁵/₆₄" should be checked.

† Mounting flange gasket is not part of the burner and must be ordered separately.

‡ For extended "L" dimension flame retainers ("L" dimension in 1/2" increments from L = 12" to L = 24") insert required "L" dimension in the blank space. For example: 4-28524-14 for 4725-2/3 flame retainer with "L" dimension of 14" or 4-28526-16.5 for 4725-5/6 flame retainer with "L" dimension of 16 1/2". For complete burner assemblies with extended "L" dimensions, consult factory for special part numbers.

Parts Order Must Specify: 1 - Burner Designation 2 - Part Name 3 - Part Number
