† Gas Tube, Air Sleeve, Tube Disc, Gas Stabilizer, and Air Tubes are an Integral Assembly and must be purchased as a unit called "Gas Tube and Air Sleeve Assembly".

* -9 Burners sold prior to S.O.#GK 3600 should have spare part numbers verified by Engineering before ordering.

• Parts included in Atomizer Assembly.

** Use -1 gasket for furnace shell temperatures up to 825°F. Use -2 for furnace shell temperatures up to 975°F.

WARNING: Situations dangerous to personnel and property may exist with the operation and maintenance of any combustion equipment. The presence of fuels, oxidants, hot and cold combustion products, hot surfaces, electrical power in control and ignition circuits, etc., are inherent with any combustion application. Components in combustion systems may exceed 160°F (71°C) surface temperatures and present hot surface contact hazard. Fives North American Combustion, Inc. suggests the use of combustion systems that are in compliance with all Safety Codes, Standards, Regulations and Directives; and care in operation.
