**NOTES:**

- As Indicated by sixth digit of model. Replacement motor must be the same size code and voltage code as the original motor. Rotors and stators are not available separately. Replacement motors include Item 54H, Fig. 10, Page 13.)
- The unused protector leads should be cut off in the area where they exit the bundle. They should be cut off at different lengths (approximately 1/4" difference) to prevent the bare ends from touching one another. The remaining portion of the unused protector leads must then be ty-rapped rigidly to the stator coils to prevent the exposed ends from touching any other component.
